Professional Summary

Computer and Systems Engineering graduate with first-level technical support experience and hands-on network infrastructure work. Skilled in providing technical support for hardware, software, and network issues; troubleshooting and maintaining desktops, laptops, printers, and peripherals; managing user accounts and software installations; supporting Windows and Office 365 environments; and managing IT service tickets to resolution within required time. Strong knowledge of TCP/IP, DNS, DHCP, and Active Directory user management. Seeking an IT Support Engineer role.

Work Experience

Sutherland — *Technical Support Representative* **May 2026 – Oct 2026**

- Provided first-level remote technical support for home internet subscribers, resolving 25–35 hardware, software, network, and account issues per day via phone while meeting required resolution times.
- Guided users through troubleshooting and software installation/setup steps; diagnosed LAN/Wi-Fi, TCP/IP, DNS, and DHCP faults; documented and updated IT service tickets, and escalated complex cases to higher-tier support.
- Supported user account setup, access issues, and application configuration, ensuring issues were resolved within agreed time limits.

Global Brands Group (GBG) — *Network & Cloud Infrastructure Intern* **Feb 2026 – May 2026**

- Completed a 3-month internship covering network infrastructure, TCP/IP, DNS, DHCP, subnetting, and troubleshooting, working alongside engineers on live multi-region environments.
- Monitored and maintained network health, route tables, security groups, and firewall rules; gained hands-on exposure to VPC networking, incident handling, and change-controlled operations.

Skills

- **Networking:** TCP/IP, DNS, DHCP, LAN/Wi-Fi, IP Configuration, Subnetting, Switches & Routers, VPN, Gateway & Firewall Rules, Network Troubleshooting
- **Systems & Hardware:** Windows OS (10/11) Installation/Configuration, MS Office / Office 365, Drivers & Peripherals, Desktop/Laptop/Printer Troubleshooting, Hardware & Software Fault Diagnosis, Linux Administration
- **User & Account Support:** Active Directory (Users, Groups, Permissions, User Management), Email Permissions, Account Setup & Access Issues, Software Installation & Configuration
- **IT Support Operations:** IT Service Ticket Management & Documentation, Remote Support (AnyDesk), Escalation, Resolution Within Required Time, Phone/Remote/Desk-Side Support
- **Cloud & Virtualization:** AWS (EC2, S3, VPC, IAM, RDS, Route 53, Network Firewall), VMware vSphere/ESXi, Docker
- **Soft Skills:** Strong Communication, Problem Solving, Customer-Focused, Teamwork, Leadership, Time Management

Projects

GBG Internship Project — Multi-Region Network & Cloud Infrastructure

- Designed and deployed a scalable multi-region Hub-and-Spoke architecture via Transit Gateway, with centralized Network Firewall, WAF, route tables, and security groups.
- Implemented Route 53 DNS routing, cross-region VPC connectivity, S3 replication, and RDS cross-region replication with Multi-AZ standby for DR coverage.

Home Lab — Active Directory & Network Infrastructure

- Deployed a Windows Server Active Directory domain across 3 VMs, configuring users, groups, permissions, and domain administration end-to-end.
- Built and maintain a hosted Home Assistant smart-home system with remote access via AnyDesk, handling device setup, networking, and troubleshooting.

Trainings

CCNA Networking — Cisco NetAcademy: IP addressing, switching, routing, subnetting, LAN/Wi-Fi, TCP/IP, DNS, DHCP, and network troubleshooting.

Cloud Solutions Architect — NTI **Oct 2025 – Jan 2026**
420-hour program covering Red Hat, VMware, and AWS platforms; eligible for RHCSA EX200, VMware VCP-DCV, and AWS Solutions Architect certifications.

Certificates

AWS Certified Cloud Practitioner | **AWS Academy:** Cloud Architecting, Foundations, Security
Red Hat Academy: Linux Admin I & II

Education

Zagazig University — B.Sc. Computer & Systems Engineering **Sep 2020 – Jul 2025**
Languages: English (Proficient), Arabic (Native)
